BIOSYSTEMS

# REDEFINING procedural efficiency

without compromising tissue quality – from  
positioning to diagnosis.

Mammotome revolve is designed for accuracy, repeatability and efficiency, while staying true to your core purpose – acquiring the best quality tissue during your patient's biopsy. Advanced tissue management technology minimizes tissue handling while eliminating procedure steps to improve workflow and get your patient off the table faster.

stereotactic/tomosynthesis\* **ST**

- Easy access controls and feedback for confident tissue acquisition
- Automatic collection and organization of cores into touch-free collection chambers
- Efficient workflow; streamlined specimen X-ray and transport to pathology
- Patented DualVac technology lets you more quickly acquire desired volume of tissue, while maximizing amount of intact cores for a comprehensive diagnosis

ultrasound **U/S**

- Robust yet lightweight and ergonomic handpiece for a comfortable fit and control
- Advanced needle technology offers lowest force to penetrate for ease of insertion
- Patented DualVac technology lets you more quickly acquire desired volume of tissue, while maximizing amount of intact cores for a comprehensive diagnosis

**Mammotome revolve**  
dual vacuum-assisted biopsy system

## EFFICIENT POSITIONING, TARGETING AND ACCESS

**Easier** patient positioning with greatest access to posterior chest wall lesions

**Most accurate** placement and minimized tissue deflection

**Ready** for every case with on-demand variable aperture in a single probe

## PATIENT AND PHYSICIAN COMFORT

**Instant** SteadyVac to minimize hematoma

**On-board** undiluted fluid delivery for patient comfort

**Comfortable** and ergonomic control; real-time clinician feedback

## FASTEST SAMPLING WITH UNTOUCHED QUALITY CORES

**Faster** biopsy with untouched high quality Mammotome cores

**Known** individual core acquisition and location throughout procedure

## UNCOMPROMISED CONFIRMATION

**Immediately** ready for imaging; no time needed to scrape or sort cores

**Eliminates** tissue handling from collection to pathology

**Complete** and informed picture to pathology for efficient diagnosis

\*Compatibility varies by manufacturer.
